### Functional Features Overview:

This document lists all the functional features included in the Personalized Networking Assistant solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

| S.No | Feature Name                    | Feature Description                                                                               | Module / Component                 | Status (Done/In Progress/Pending) | Marks Contribution |
|------|---------------------------------|---------------------------------------------------------------------------------------------------|------------------------------------|-----------------------------------|--------------------|
| 1    | Event Theme Extraction          | Extracts key themes (e.g., AI, sustainability) from the event description entered by the user     | event_analyzer.py (DistilBERT)     | Done                              | 0.6                |
| 2    | Conversation Starter Generation | Generates 2-3 context-aware conversation prompts aligned with user interests and extracted themes | topic_generator.py (GPT-2)         | Done                              | 0.6                |
| 3    | Fact Verification               | Provides a summarized, reliable reference on a searched topic using the Wikipedia API             | fact_checker.py                    | Done                              | 0.6                |
| 4    | Conversation History Logging    | Stores previously generated conversations for later review                                        | history_logger.py / history.json   | Done                              | 0.6                |
| 5    | User Feedback Capture           | Allows users to mark suggestions as useful (thumbs up/down) to improve personalization            | feedback_logger.py / feedback.json | Done                              | 0.6                |
| 6    | Interactive Streamlit UI        | Input section for event description and interests, with buttons to trigger generation             | Streamlit frontend                 | Done                              | 0.6                |
| 7    | FastAPI REST Endpoints          | Exposes /generate-conversation, /fact-check, and /analyze-event routes                            | FastAPI backend                    | Done                              | 0.5                |
| 8    | Automated Unit Testing          | Validates core services and API endpoints using pytest and httpx                                  | tests/ (pytest suite)              | Done                              | 0.4                |

### Feature Summary:

| Metric                     | Count / Value |
|----------------------------|---------------|
| Total Features Planned     | 8             |
| Total Features Implemented | 8             |
| Core / Must-Have Features  | 5             |

| Metric                             | Count / Value |
|------------------------------------|---------------|
| Additional / Nice-to-Have Features | 3             |
| Features Tested & Verified         | 8             |

***Feature Category Breakdown:***

| S.No | Category                  | Features in Category | Example Features                                                                |
|------|---------------------------|----------------------|---------------------------------------------------------------------------------|
| 1    | User Interface (UI)       | 1                    | Interactive Streamlit input and output UI                                       |
| 2    | Backend / Logic           | 3                    | Event Theme Extraction, Conversation Starter Generation, FastAPI REST Endpoints |
| 3    | Database / Storage        | 2                    | Conversation History Logging, User Feedback Capture                             |
| 4    | API / Integration         | 1                    | Fact Verification via Wikipedia API                                             |
| 5    | Security / Authentication | 0                    | Not implemented in current scope; planned as a future enhancement               |
