Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., User, Wikipedia API).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Analyze Event, Generate Starters).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., User Profiles, Interaction Logs).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below illustrates how data flows through the Personalized Networking Assistant, from event/bio input through theme analysis, starter generation, and fact verification.
