Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS		THINKS
"I never know what to say when I meet someone new at these events." "I wish I could quickly check a fact before I bring it up." "I want to remember which openers actually worked last time."	PERSONA NAME <i>Networking Event Attendee (Job Seeker / Professional)</i>	- Will this topic actually interest the other person? - I hope I don't say something factually wrong. - There must be a smarter way to prepare for networking.
DOES		FEELS
- Skims the event description right before arriving. - Searches topics on a phone at the last minute. - Jots notes after conversations to recall what worked.		- Anxious about running out of conversation topics. - Uncertain about the accuracy of information at hand. - Motivated to keep improving networking skills over time.
